Please see below the “do’s and don’ts” before and after the pest control treatment:

BEFORE THE TREATMENT

- All people and pets are encouraged to vacate the area for 2-3 hours. For asthmatic, allergic, and sick, a longer period is recommended.
- Clear out the kitchen sink cabinets and another possible harborage for pests. Generally, declutter so we could have access to baseboards, corners etc.
- The following should be kept during treatment
 - children's toys and supplies
 - exposed or open food items
 - kitchen utensils, dishes, etc.
 - food preparation surfaces must be free from obstruction

AFTER THE TREATMENT

- Ventilate the area before occupying it.
- Do not touch cockroach bait or allow children or pets to get nearby.
- Clean the treated area thoroughly. Wash everything to be used for eating and cooking.
- Keep sanitation to as high a level as possible.
